

Introduction to Core Addiction Practice (CAP) Workshop

Core Addiction Practice (CAP) Workshops are being offered by the Northern Health Authority in conjunction with the Drug Treatment Funding Program (DTFP) provincial initiative.

The Core Addiction Practice education series is designed to contribute to a shared understanding of addiction treatment best practices and to assist practitioners to develop the professional competencies required to implement those practices. The CAP workshop brings together critical information and skills training into a standardized package.

The specific objectives for providing CAP workshop are to:

1. Support meaningful and relevant professional development
2. Develop practitioner capacity for evidence-based services.
3. Provide an opportunity for practitioners to network and enhance linkages.
4. Support the development of core competencies within organizations.

This Pre-Workshop Questionnaire contributes to the achievement of these objectives by:

1. Supporting personal reflection prior to the workshop,
2. Generating participant input for workshop facilitators, and,
3. Generating baseline data to track workshop impact

Workshop logistics (location, time etc.) will be provided closer to the actual workshop dates. Please contact me if you have any questions.
